

**IN THE SPECIFICATION:**

Delete the second full paragraph on page 4 (lines 7-13) and substitute the following:

–Figure 6 shows the raising of strut member 20. Through the winding of the hoisting cable on hoist 36, the strut member 20 is straightened independently and guys front anchoring rod 40. An adjustment coil 42, with which an adjustment strap 44 is coupled, is positioned on main boom 12. Through the winding of an adjustment cable 46 off adjustment coil 42, and the simultaneous winding up of hoist 36, the upper adjustment pulley 48 is drawn to the tip of the strut member until a pin 50 at the upper adjustment pulley 48 engages in a hook 52 (compare Figure 7 and particularly Detail A on Figure 7).–.
